Rules for achieving and maintaining IATF Recognition

IATF Rules 5th Edition – **Sanctioned Interpretations**

The *Rules for achieving and maintaining IATF Recognition 5th Edition for IATF 16949* (“**Rules 5th Edition**”) was published in November 2016 and is effective 1 January 2017. The following Sanctioned Interpretations were determined and approved by the IATF. Unless otherwise indicated, Sanctioned Interpretations are applicable upon publication.

Revised text is shown in **blue**.

A Sanctioned Interpretation changes the interpretation of a rule or a requirement which itself then becomes the basis for a nonconformity.

SI 1 issued in June 2017, effective 1 July 2017. **SI 2 to 5 issued in October 2017, effective 1 October 2017.**

NUMBER	RULES REFERENCE	SANCTIONED INTERPRETATION
1	<p>Application process and criteria for IATF 16949 auditors 4.2</p>	<p>The certification body shall have a process for selecting new auditor candidates for admission into the IATF auditor qualification process. The contracted office of the sponsoring certification body shall submit for each candidate a completed application form and relevant supporting information to the relevant IATF Oversight office for approval and access to the IATF auditor qualification process.</p> <p>The auditor candidate shall meet the following selection criteria:</p> <ul style="list-style-type: none"> a) is qualified according to ISO/IEC 17021 and the relevant accreditation body rule to perform ISO 9001 audits; b) has conducted at least six (6) ISO 9001 third-party audits in manufacturing industries, with at least three (3) as audit team leader; <p>Note: Automotive manufacturing first- or second-party system auditing experience may be considered.</p> <ul style="list-style-type: none"> - has knowledge of automotive core tools; and - has four (4) years full time appropriate practical experience (including two (2) years dedicated to Quality Assurance and/or Quality Management activities) in within the past fifteen (15) ten (10) years in an automotive manufacturing organization. Meeting the applicability of IATF 16949 (see section 1.0). <p>NOTE: Experience in industries with similar scopes of applicability (e.g., Aerospace, Telecommunications, Rail, Industrial Off-Road equipment, etc.) in chemical, electrical, or metallic commodities may be considered.</p> <p>Rationale for change:</p> <p><i>Allow for additional automotive auditor capacity to support the IATF 16949:2016 transition.</i></p>

NUMBER	RULES REFERENCE	SANCTIONED INTERPRETATION
2	<p style="text-align: center;">Special audits 7.2</p>	<p>It may become necessary for the certification body to conduct special audits of certified clients:</p> <ul style="list-style-type: none"> - to investigate performance complaints (see section 8.1 a) and 8.1 b); - in response to changes to the client’s quality management system (see section 3.2); - significant changes at the client’s site; - as a result of a suspended certificate (see section 8.3); - to verify the effective implementation of identified corrective actions for major nonconformities (see section 5.11.4); - to verify the effective implementation of identified corrective actions for nonconformities considered open but 100% resolved (see section 5.11.3 c); - to verify the implemented corrective actions are showing improvement in the achievement of the customer performance indicator(s); - as a result of a withdrawn certificate (see section 8.7). <p>Rationale for change:</p> <p><i>The IATF has seen situations where a certification body issues a major nonconformance to a client for not achieving their customer’s performance indicators (i.e. delivery and/or quality) or due to an IATF OEM special status condition. The certification body suspends the client’s IATF 16949 certificate and conducts an onsite special audit. During the onsite special audit, the certification body can verify effective implementation of the identified corrective actions, but not enough time has passed to see the actions have led to the achievement/improvement of the customers performance indicator(s). This new requirement gives the certification body flexibility to revisit the client’s site within a reasonable timeframe after the first special audit to verify sustainable improvement in the customer reports/scorecards.</i></p>

NUMBER	RULES REFERENCE	SANCTIONED INTERPRETATION
3	<p>Initial qualification process 4.3.1</p>	<p>Once granted access to the IATF auditor qualification process, the new auditor candidate shall demonstrate technical competence through successful completion of the IATF mandatory face-to-face initial qualification process. Upon successful completion of the initial qualification process, the auditor will be issued an IATF certification body auditor identification card, and the sponsoring certification body will be issued a certificate that shall have a two (2) year validity period to formally allow the auditor to conduct audits for the certification body.</p> <p>The certification body shall ensure that the auditor enters the online IATF auditor development process within sixty (60) days of the initial qualification.</p> <p>Rationale for change:</p> <p><i>The issuance of the auditor certificate demonstrates qualification rendering the auditor card redundant. Auditor candidates are now required to enter the IATF ADP prior to the initial face to face qualification instead of entering within sixty (60) days after initial qualification.</i></p>
4	<p>Requalification process 4.3.2</p>	<p>The certification body shall ensure that the auditor completes the initial knowledge and application assessments in the online IATF auditor development process within two (2) years of the initial qualification.</p> <p>Upon successful completion of the requalification process, the auditor will be issued a new IATF certification body auditor identification card, and the sponsoring certification body will be issued a certificate to formally allow the auditor to continue to conduct audits for the certification body.</p> <p>Rationale for change:</p>

NUMBER	RULES REFERENCE	SANCTIONED INTERPRETATION
		<p><i>The issuance of the auditor certificate demonstrates qualification rendering the auditor card redundant.</i></p>
<p>5</p>	<p>Supporting activities 5.5</p>	<p><i>The certification body shall enter the information about each audited support function (i.e. audited location name, audit dates, auditor name(s) and audit days for each auditor) in the comment field under a manufacturing site’s audit. If a remote support function supports more than one manufacturing site, the certification body shall enter the audit information under a single manufacturing site. The information shall be in the specified format, in English.</i></p> <p><i>Rationale:</i> <i>To clarify the process for entering the audits of remote support locations into the IATF database to ensure consistency between certification bodies and to streamline the current process observed.</i></p>
