

**SUBJECT:** Publication of Geely Group IATF 16949 CSRs  
**ISSUE DATE:** October 2021  
**REF:** 003

## IATF Global Oversight

### IATF Stakeholder Communiqué

The purpose of this Stakeholder Communiqué is to advise all IATF Stakeholders of publication of the Geely Group IATF 16949 Customer Specific Requirements (CSRs).

In support of the IATF's "Global Growth" imperative to expand the breadth and depth of engagement with the scheme around the world, the IATF continue to integrate our newest IATF voting member, Geely Group, into the IATF processes and requirements.

One of the steps of that IATF integration is the publication of Customer Specific Requirements (CSRs) for Geely Group.

Aligned with a simplified CSR approach, Geely Group has released the first edition of their IATF 16949 Customer Specific Requirements limited to their key requirements associated with certification to IATF 16949.

Since Geely Group requires all its suppliers to be certified to IATF 16949, this will help clarify the full set of IATF QMS requirements to be implemented by those certified organizations and validated by their certification bodies.

Geely Group continues to work on other steps in their integration into IATF 16949 processes, such as adding Geely supplier codes to the IATF database and developing their scorecard Quick Reference Guide.

The Geely Group CSRs will be published on the IATF Global Oversight website <https://www.iatfglobaloversight.org/> on 7th October 2021.
